Countries emerging from long periods of authoritarian rule must often confront a legacy of gross human rights abuses perpetrated over many years. During the past two decades, these age-old issues have been termed “problems of transitional justice”, both by academics and policymakers around the world.

The Series on Transitional Justice offers a platform for high-quality research within the rapidly growing field of transitional justice. The volumes are inter-disciplinary in nature, drawing from disciplines such as law, political science, history, sociology, criminology, anthropology and psychology, as well as from various specialized fields of study such as human rights, victimology and peace studies. Furthermore, the series has an international outlook, drawing on the knowledge and experience of academicians and other specialists in many different regions of the world.
